

# marks the rot!

## The Awful A-Z of English Council Election Results courtesy of our outdated First-past-the-post voting system Updated to include the 2025 results

315 English Councils are listed below in alphabetical order, each one summarizing the percentage disparity between seats and votes of the dominant party at the most recent local election for that council.

English local governance is a hotchpotch of different types of administrations - Counties, Mets, Districts and Unitaries - , some electing all their councillors in every fourth year, while others have partial elections spread over a four year period. Additionally, some local election have been postponed pending local government reorganisation. This explains why, while there are local elections of some sort somewhere in England every year, some councils haven't had a local election since 2021.

In the case of multi-member wards, the vote of the best placed candidate for each party is used in calculating the percentage support for that party in the ward. The percentage votes quoted here can be checked against the results published in the Rallings and Thrasher Local Elections Handbooks.

Most entries are accompanied by an **X** rating:

- X** denotes a percentage disparity of 10% and over between seats won and votes received by the dominant party;
- XX** denotes a percentage disparity of 20% and over;
- XXX** denotes a percentage disparity of 30% and over;
- XXXX** denotes a percentage disparity of 40% and over.
- !** denotes an additional notable defect in the result for that council.

Of the 315 Councils, 14 (4%) are **XXXX** , 43 (14%) are **XXX**, 82 (26 %) are **XX**, and 107 (34%) are **X**

**Please note that, while best endeavours have been used to ensure that this list is complete and accurate, it is essentially an amateur compilation.**

- XXX** **ADUR**: In 2024, Labour took 81% of the seats with 46% of the vote.

- XXX!** **RICHMOND UPON THAMES:** In 2022, the Liberal Democrats took 89% of the seats with 51% of the vote. The Conservatives came second with 23% of the vote but won only 1 seat, while the Greens won 5 seats with 13% of the vote – 10% fewer votes than the Conservatives.
- XX** **ROCHDALE:** In 2024, Labour took 70% of the seats with 42% of the vote.
- X!** **ROCHFORD:** In 2024, The Liberal Democrats took 31% of the seats with 18% of the vote. The Conservatives took fewer seats (23%), even though they polled more votes (31%).
- XX** **ROSSENDALE:** In 2024, Labour took 67% of the seats with 41% of the vote.
- ROTHER:** In 2023, the Conservatives took 26% of the seats with 30% of the vote.
- XX** **ROTHERHAM:** In 2024, Labour took 56% of the seats with 36% of the vote.
- X** **RUGBY:** In 2024, The Conservatives took 43% of the seats with 32% of the vote
- !** **RUNNYMEDE:** In 2024, Labour took 28% of the seats with 23% of the vote. The Conservatives took fewer seats (21%), even though they polled more votes (33%).
- XX** **RUSHCLIFFE:** In 2023, the Conservatives took 57% of the seats with 37% of the vote.
- XX** **RUSHMOOR:** In 2024, Labour took 69% of the seats with 48% of the vote.
- RUTLAND:** In 2023, the Liberal Democrats took 41% of the seats with 41% of the vote.
- XX** **SALFORD:** In 2024, Labour took 86% of the seats with 58% of the vote.
- XXX** **SANDWELL:** In 2024, Labour took 92% of the seats with 57% of the vote.
- XX** **SEFTON:** In 2024, Labour took 77% of the seats with 54% of the vote.
- X** **SEVENOAKS:** In 2019, the Conservatives took 61% of the seats with 46% of the vote.
- X** **SHEFFIELD:** In 2024, Labour took 52% of the seats with 39% of the vote.
- XX** **SHROPSHIRE:** In 2025, the Liberal Democrats took 57% of the seats with 34% of the vote.
- SLOUGH:** In 2023, the Conservatives took 50% of the seats with 43% of the vote.
- X** **SOLIHULL:** In 2024, the Conservatives took 65% of the seats with 50% of the vote.
- X** **SOMERSET:** In 2022, the Liberal Democrats took 55% of the seats with 41% of the vote.
- XXX** **SOUTH CAMBRIDGESHIRE:** In 2022, the Liberal Democrats took 82% of the seats with 48% of the vote.
- X** **SOUTH DERBYSHIRE:** In 2023, Labour took 64% of the seats with 46% of the vote.
- SOUTH GLOUCESTERSHIRE:** In 2023, the Conservatives took 38% of the seats with 34% of the vote.
- X** **SOUTH HAMS:** In 2023, the Liberal Democrats took 61% of the seats with 43% of the vote.
- SOUTH HOLLAND:** In 2023 the Conservatives took 51% of the seats with 46% of the vote.
- X!** **SOUTH KESTEVEN:** In 2023, the Conservatives took 43% of the seats with 29% of the vote, while the Independents took 39% of the seats even though they had polled far more votes (38%).
- X** **SOUTH NORFOLK:** In 2023, Conservatives took 52% of the seats with 35% of the vote.
- XX!** **SOUTH OXFORDSHIRE:** In 2023, the Liberal Democrats took 58% of the seats with 37% of the vote. The Conservatives had only one seat (3% of the total) to show for their 26% of the vote.
- X** **SOUTH RIBBLE:** In 2023, Labour took 58% of the seats with 43% of the vote.
- XX** **SOUTH STAFFORDSHIRE:** In 2023, the Conservatives took 69% of the seats with 40% of the vote.
- XX** **SOUTH TYNESIDE:** In 2024, independent candidates took 55% of the seats with 32% of the vote.
- XXX** **SOUTHAMPTON:** In 2024, Labour took 70% of the seats with 40% of the vote.
- SOUTHEND ON SEA:** In 2024, Labour took 41% of the seats with 32% of the vote
- XXX** **SOUTHWARK:** In 2022, Labour took 82% of the seats with 52% of the vote.
- SPELTHORNE:** In 2023, the Conservatives took 31% of the seats with 27% of the vote.
- XXX** **ST. ALBANS:** In 2024, the Liberal Democrats took 81% of the seats with 49% of the vote.
- X** **ST. HELENS:** In 2022, Labour took 60% of the seats with 44% of the vote.
- STAFFORD:** In 2023, the Conservatives took 35% of the seats with 33% of the vote.

- XXX!** **STAFFORDSHIRE:** In 2025, Reform UK took 79% of the seats with 41% of the vote. The Labour Party took only 1 out of the 62 seats (2%) with 16% of the vote.
- STAFFORDSHIRE MOORLANDS:** In 2023, Labour took 43% of the seats with 34% of the vote.
- XXXX** **STEVENAGE:** In 2024, Labour took 82% of the seats with 37% of the vote.

# Why First-past-the-post isn't working

All English councillors serve a 4 year term, but practice varies when it comes to how many councillors there are per ward and whether the entire council is elected in one go or whether elections are spread over 4 years. Unfortunately, the continued use of the First-past-the-post voting system in English Council elections distorts the results, no matter which permutation of ward representation is chosen. A simple 2-party model shows what can go wrong using the two First-past-the-post voting methods in common use in English local elections. The same model can then be used to show how these discrepancies can be eliminated by using the Single Transferable Voting system of proportional representation in multi-member wards. Alongside is a diagram comprising 100 X's in a grid to represent a community we shall call Smalltown. Each X is coloured to depict supporters of the Red or Blue parties.

## First-past-the-post in single member wards

With this method, Smalltown is divided into 3 areas known as wards, each ward returning a single councillor. The Red and Blue Parties field one candidate apiece in each ward and ward residents have one vote each, cast using a single X. The map alongside shows Smalltown divided into North, South and Central Wards, and below, the ballot papers as Red supporters would complete them, together with the results for each ward.

The winner with the most votes in each ward is highlighted in yellow, showing that the Blues have won 2 out of the 3 seats in Smalltown using this method.

**BLUE WIN**

**RED WIN**

**BLUE WIN** x

But all is not what it seems. If we add the total Smalltown votes for each party, we will find that, while the Blues polled 40 of the votes to win 2 seats, the reds have only one seat to show for their 60 votes. How did that happen? Well, if you look at the Smalltown map, you will notice a concentration of Red voters in Smalltown's Central Ward. While Linda Likeable's 29 votes were impressive, she needed only 5 of those votes to defeat her opponent, who had 4. The remaining 24 could have been put to better use in the other wards where support for the Reds was not as strong. Let's try another way of using First-past-the-post.

## First-past-the-post in multi-member wards

With this method, Smalltown has 3 councillors as before, but now the North, Central and South wards are all merged, so the 3 councillors all represent the entire town in one large 3-member ward. As a result, Smalltown voters will have 3 votes each to cast on one ballot paper, with the Reds and the Blues fielding 3 candidates apiece. Below is the ballot paper of a Red Party supporter casting three Xs for the Red candidates, together with the multi-member ward map and the results table.

**RED WIN**

**RED WIN**

**RED WIN** ✗

Now we have a quite different result - 3 Red wins this time - even though the electorate is exactly the same and has voted the same as they did in the single member method. According to this result, Smalltown is now a Red Party stronghold, even though it clearly is not if you look at the vote totals – 180 votes (60%) for the Reds versus 120 votes (40%) for the Blues.

Evidently, all it took to change the result of the election was to change from a single-member to a multi-member ward system and even then neither result accurately reflected the corporate will of the voters of Smalltown. While the creation of a multi-member ward should in theory have enabled different political persuasions to be represented, the way the votes were cast and counted ensured that the Reds swept the board. Some councils have multi-member wards but elect just one member per ward per year. This allows for a change of support to another party in future years but, more often than not, the dominant party's candidates prevail year after year. There is no point in having multi-member wards if the way the votes are counted determines that, while 60% of Smalltown voters have 3 councillors of their political persuasion, 40% of Smalltown voters have none.

## The Supervote: The Single Transferable Vote in Multi-member Wards

As in the previous method, the multi-member ward is retained but, crucially, the way the votes are cast and counted is entirely different in the quest to achieve fair shares for all.

As the name of the system suggests, each voter has a single vote which can be transferred from one candidate to another according to the expressed instructions of the voter who numbers the candidates in order of preference. Should the voter's first preference have so much support that further votes are not required to achieve election, or so few that further votes will not help, then the vote is transferred to the voter's next preference, and this process is repeated until the vote is spent or the election concluded. The recycling of votes in this way reduces the number of ineffective votes and gives most ward voters a councillor of their choice

With STV, there will be more ward activity as the parties contest every vote and as more voters participate in the election as a consequence. For a start, voters will realise that they now have a choice of party candidates; Red supporters in Smalltown North who had previously been lumbered with Max Momentum can now choose between 3 Red Party candidates, so many have switched to Linda Likeable. Moreover, voters will appreciate that the expression of preferences means that they can vote for who they please – even across party divides if they so desire - without having to think tactically, or worry about wasting their vote; for example, the Red supporter’s ballot paper alongside suggests that the voter attaches as much importance to gender as to political affiliation. Note also that this voter has no more preferences after Max Momentum, at which point the vote, if unused, is counted as “non-transferable”.

**RED WIN**

**BLUE WIN**

**STV: It’s fair, with everything for everyone everywhere to play for.**

As the above simplified results table shows, there’s a lot going on at an STV count. The drama unfolds in stages, as winners emerge and losers are eliminated, with the arithmetic checked to ensure that the votes total 100 at each stage. Unlike some other PR systems, a candidate needs a sizeable chunk of the vote to be elected under STV. This is called the quota, the absolute minimum required for election, 25 in this instance. Surpluses and votes from eliminated candidates are transferred stage by stage until the 3 winners emerge - Linda Likeable and Priti Practical for the Reds and Katie Commerce for the Blues. The combination of quota counting and transferable voting in multi-member wards ensures that proportional representation is achieved, with 2 seats awarded to the Reds for their 60% of the vote and 1 seat to the Blues for their 40%. Note that this process would have worked just as well if all of the candidates had been independents. Note also that, while the effective votes percentage for the two First-past-the-post methods was just 38% and 41% respectively, under STV it was 75% and this figure would have been even greater had the number of seats per ward been increased to between 4 and 6, as is recommended by the Electoral Reform Society. In this way, STV will invigorate our democracy at the grass roots by ensuring fair shares for all and that there will be everything for everyone everywhere to play for.
